The Savannah: The Story of a River and its City

In Partnership with The Learning Center, Savannah, GA
Monday, February 12, 2018 @ 5:30PM
Skidaway Island, GA

The Savannah River has given the city of Savannah more than just its name. Since 1733, the river has been a crucial means of transportation, a source for raw materials for industrial production and drinking water, a place for recreation, and even a sewer for industrial and human wastes. This lecture by historian William D. Bryan considers the history of Savannah River and the city that eventually grew up alongside it, ranging from nearly 12,000 years ago to the present.

Dr. William D. Bryan, a 2014-2015 Fox Center Postdoctoral Fellow, moderates this debut seminar.
